GERMS

WASH YOUR HANDS
A How-To Video

Yes No

Did you know...

Handwashing can reduce GI illness (vomiting and diarrhea)

Are you Germ Smart?

Maybe catch some re-runs tonite?

**GERMS MAKE YOU SICK
WASH YOUR HANDS**

OK so we had some fun here, but these germs are real - we know, because we grew them ourselves with actual samples from the Saskatoon area. Doorknobs, cell phones...you name it, we swabbed it.

We did it to illustrate that 80% of all infections are spread by hands. The good news? Proper handwashing can reduce illness by up to one third. Remember...clean hands stop germs!

WE ARE A GERM SMART SCHOOL!

Did you know...
80% of infectious diseases can be spread by hands and contaminated surfaces (PHAC 2008). Handwashing can reduce GI illness (vomiting and diarrhea) by 31% and respiratory illnesses (cold and flu) by 21%. (Avello et al. 2008)

Teachers play a key role in preventing the transmission of disease from the most common culprits - BACTERIA and VIRUS
