

Directions to BC Children's Hospital Blood Collection

Blood Collection at BCCH is by appointment only. Please contact the CARE Study Coordinator to book an appointment.

Bring a completed Blood Collection Form and a packaged self-collected mouthwash sample to your appointment.

Use BC Children's Hospital entrance #17. Just past the entrance on the right, you will see five dedicated COVID-19 parking spots in addition to the roundabout drop off area.

The entrance you will be using is closest to the 5 parking stalls (to the Left of the main entrance 17) and you will see a sign indicating 'Rapid Access Serology'.

Please wait outside on the covered benches until the MLA comes to collect you.

Please arrive just before your collection time to limit the number of people waiting outside at one time.

Please wear a mask.
