2020-21 ¹⁷	Due to absence of influenza circulation in BC during the COVID-19 pandemic, vaccine effectiveness evaluation could not be performed				
2021-22 ¹⁸ (327)	36 (-38, 71)	-	-	36 ^a (-38, 71)	-
2022-23 ¹⁹ (1451)	54 (38, 66)	-	-	54 (38, 66)	-

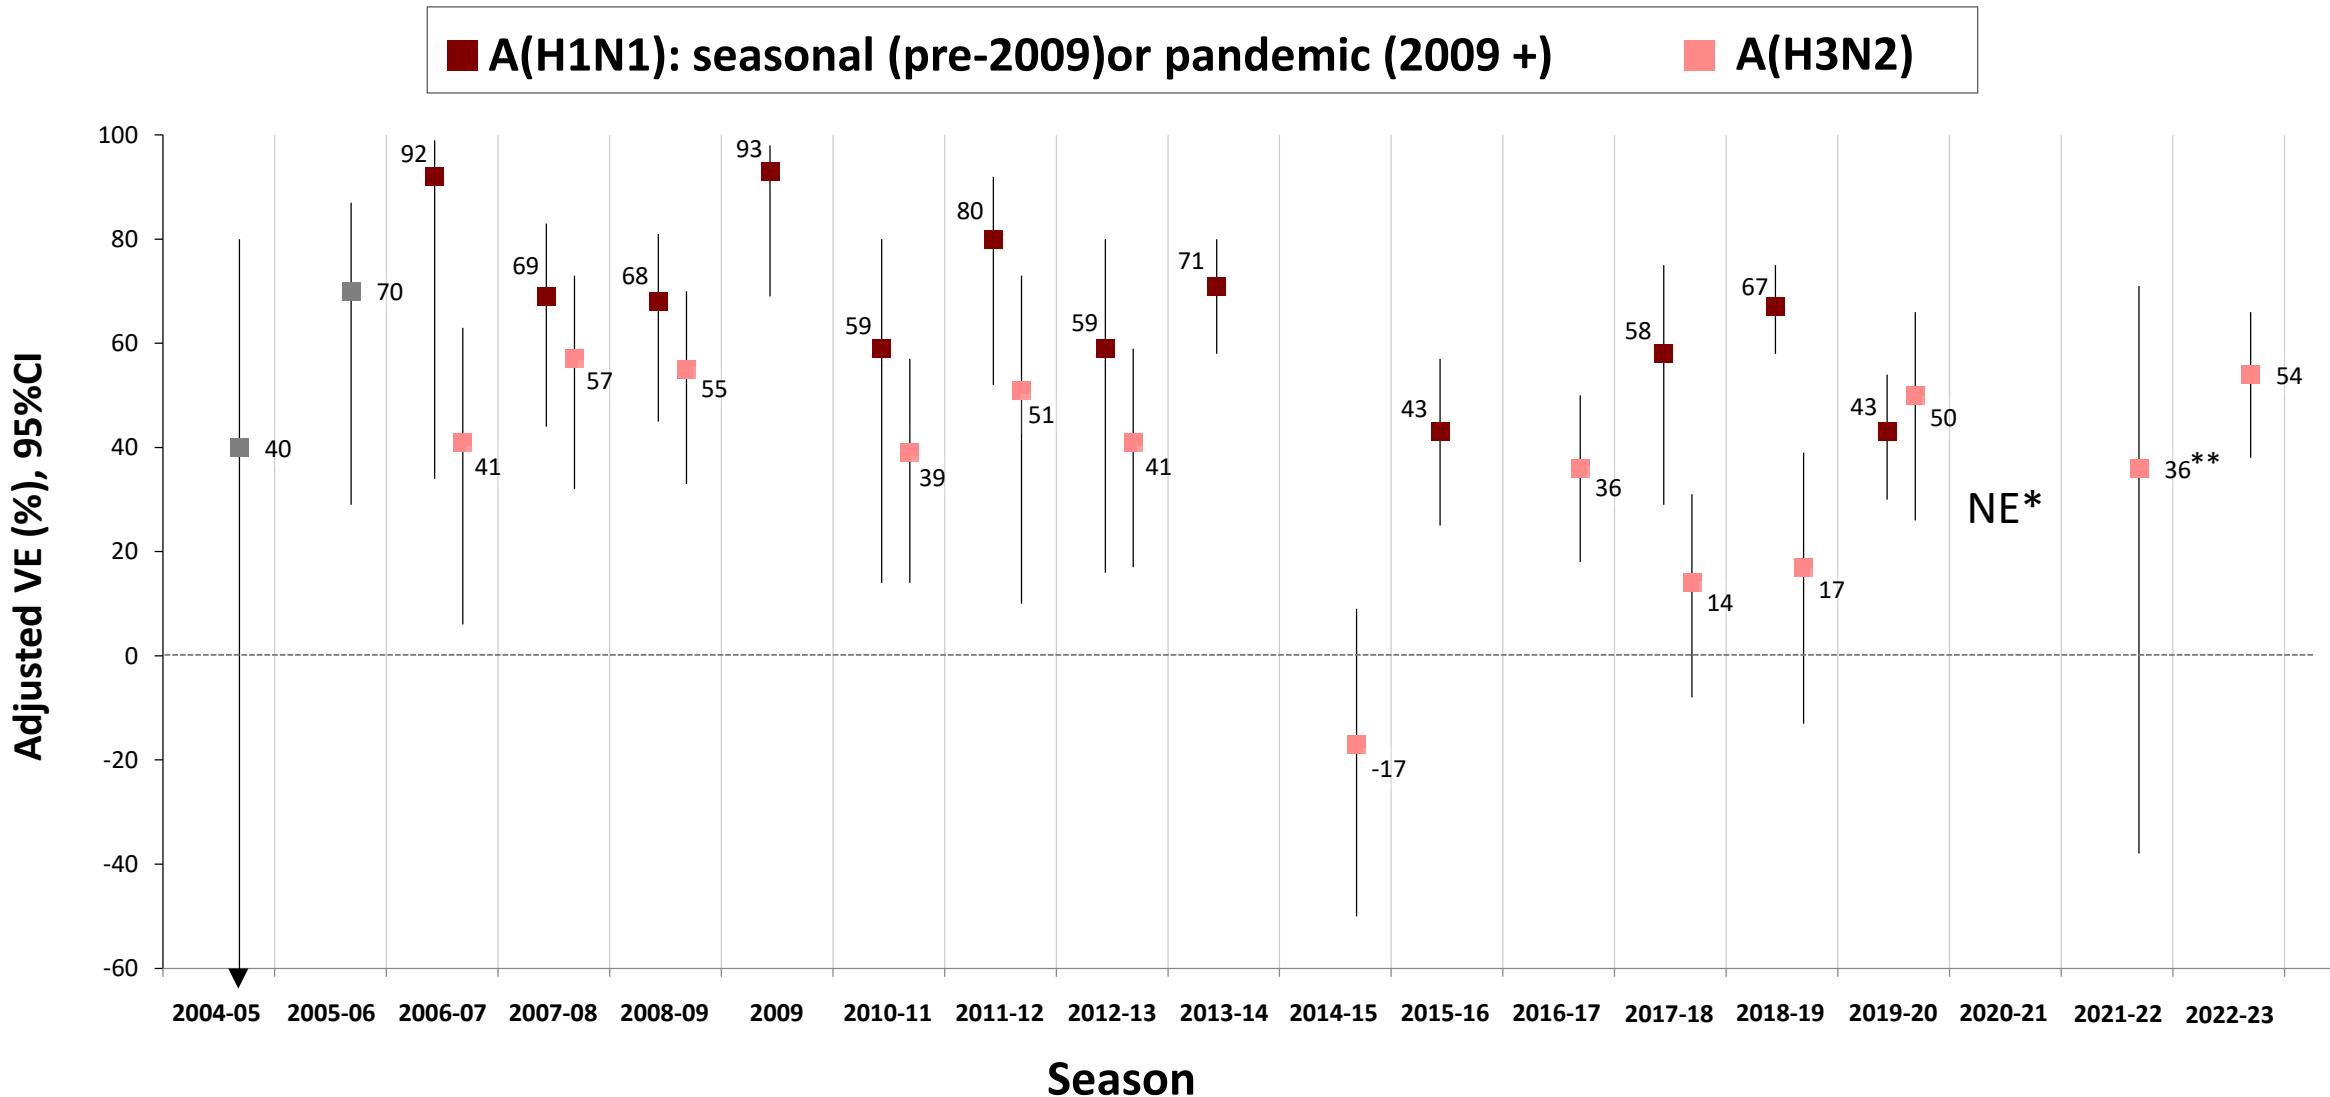

Since the 2004-05 influenza season, the Canadian SPSN has assessed influenza vaccine effectiveness (VE) by influenza type and/or subtype where possible. To facilitate cross-season comparisons, VE estimates against influenza A viruses are displayed by season in the figure below (overall estimates are shown for 2004-05 and 2005-06).
