

Epi-Week 49 Cases
November 29 to December 5, 2020

Geographic Distribution
of COVID-19 by
Local Health Area
of Case Residence

South Vancouver Island Inset

Greater Vancouver Inset

Average daily rate per 100,000 population by LHA

n = number of cases

Additional cases with missing address information:
 3 - Fraser Health
 50 - Vancouver Coastal Health
 5 - Vancouver Island Health
 89 - Northern Health

See Insets

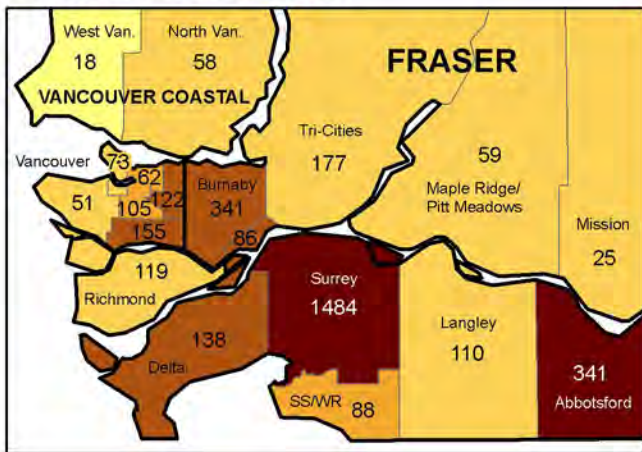

Notes: Cases are mapped by location of residence; cases with unknown residence and from out of province are not mapped. Data source: the 5 regional health authorities of British Columbia; we operate in a live database environment and case information from the health authorities are updated as it becomes available. How to interpret the maps: The map illustrates the geographic distribution of reported cases for the most recent epidemiological week (from Sunday to Saturday). Local Health Areas (LHA) with higher rates are illustrated in darker colour shading. The number of reported cases appears in each LHA. Note that the number of cases in the LHA may not represent the location of exposure (e.g. people who acquired disease while traveling or working elsewhere), and that not all COVID-19 infected individuals are tested and reported; the virus may be circulating undetected in the community, including in areas where no cases have been identified by public health. Map created December 9, 2020 by BCCDC for public release.

**Epi-Week 50 Cases
December 6 to 12, 2020**

South Vancouver Island Inset

Greater Vancouver Inset

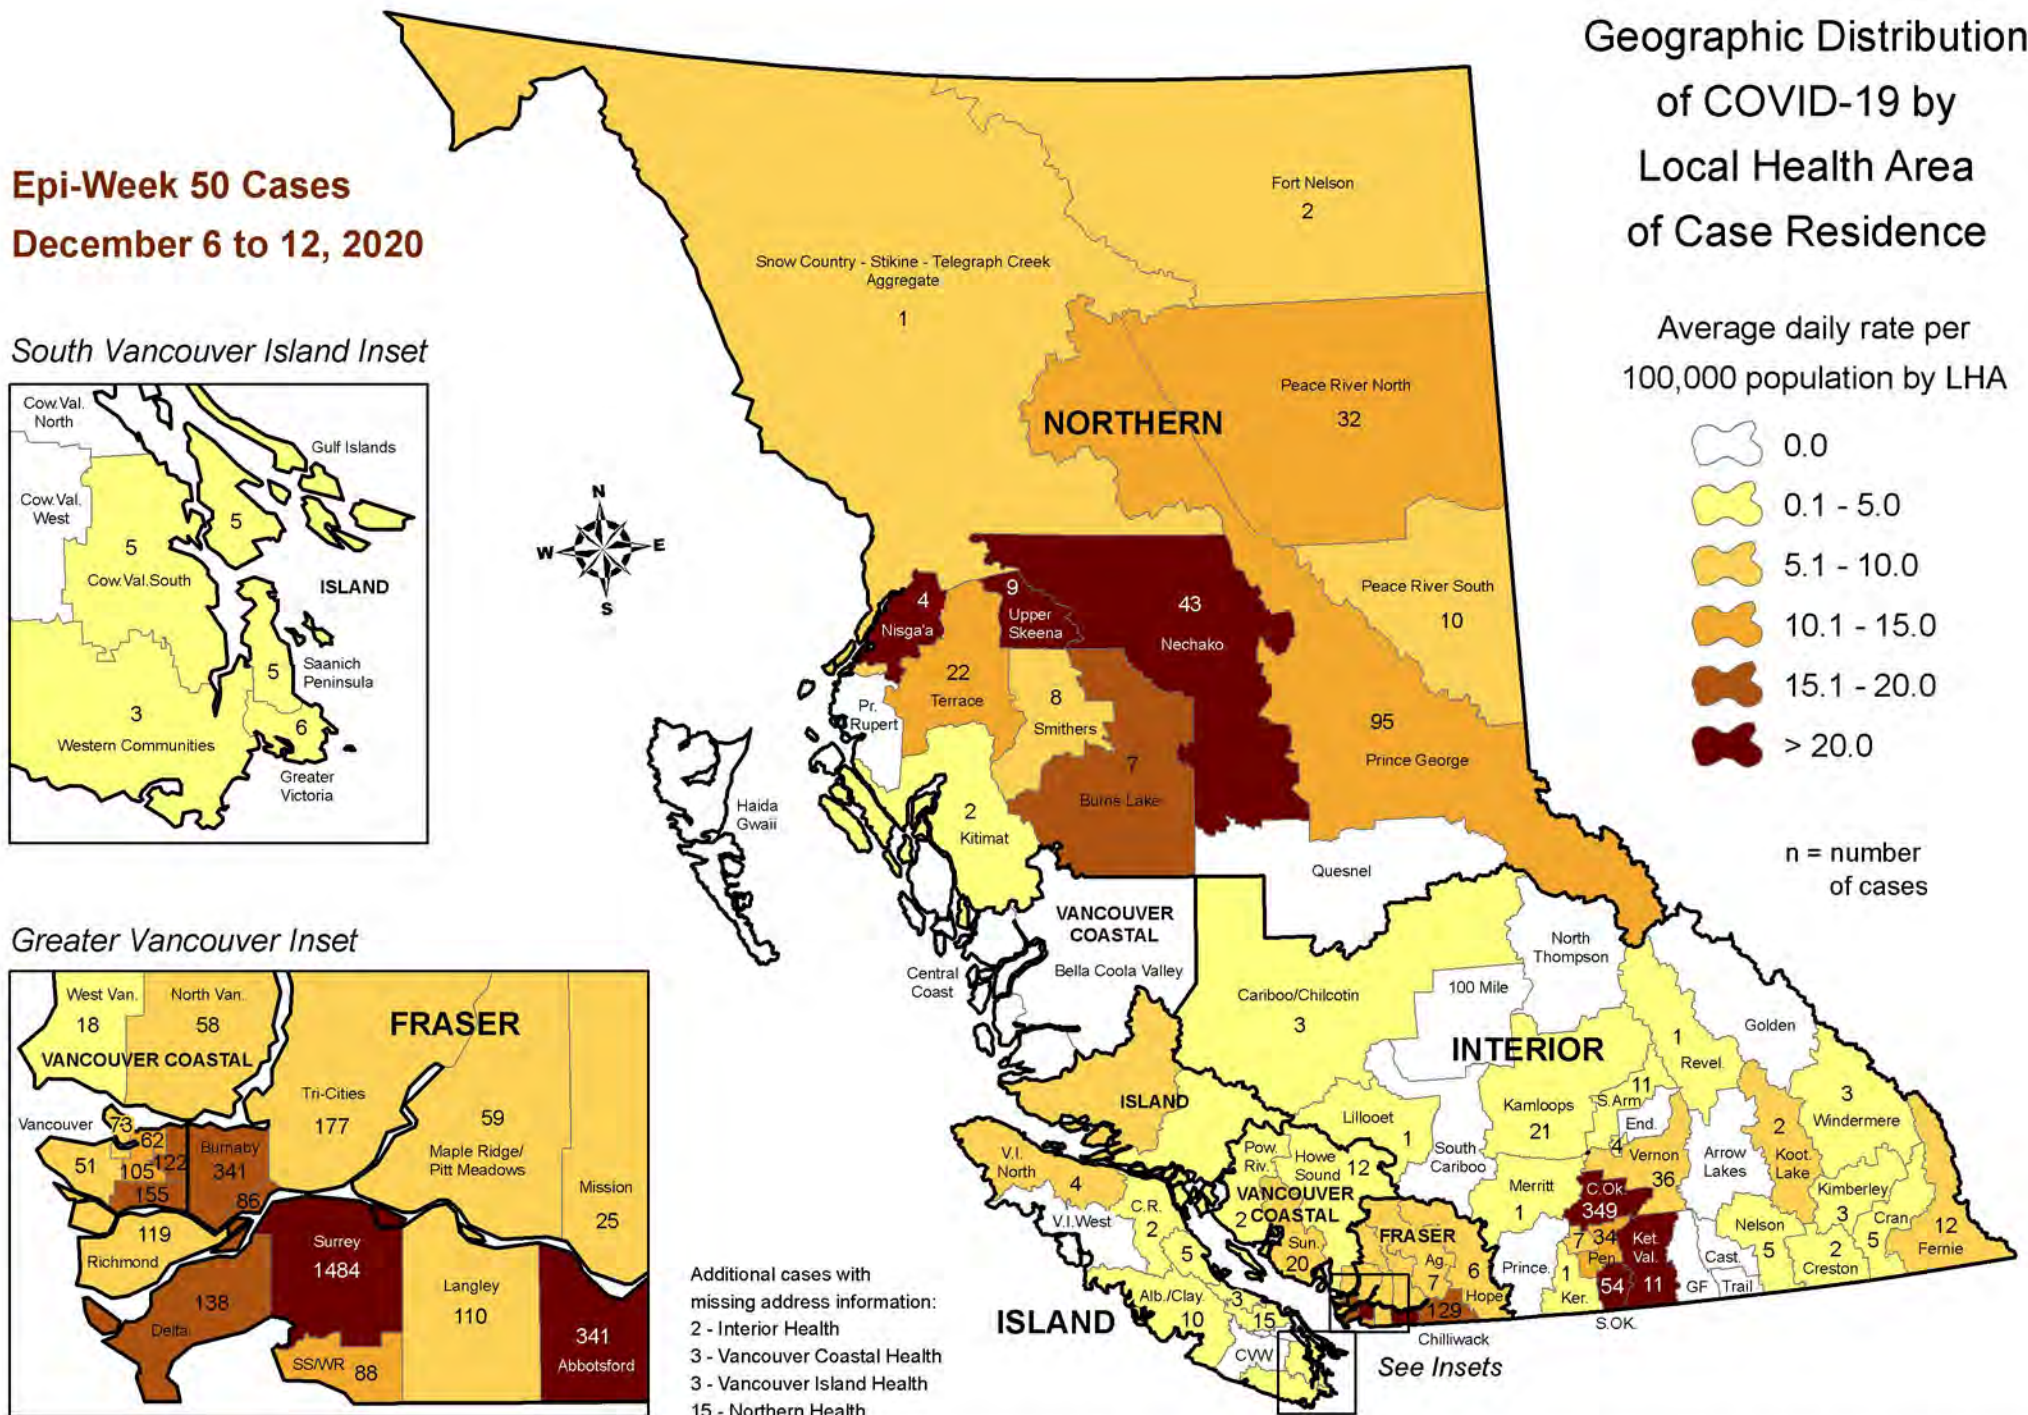

**Geographic Distribution
of COVID-19 by
Local Health Area
of Case Residence**

Average daily rate per
100,000 population by LHA

n = number
of cases

Additional cases with
missing address information:
2 - Interior Health
3 - Vancouver Coastal Health
3 - Vancouver Island Health
15 - Northern Health

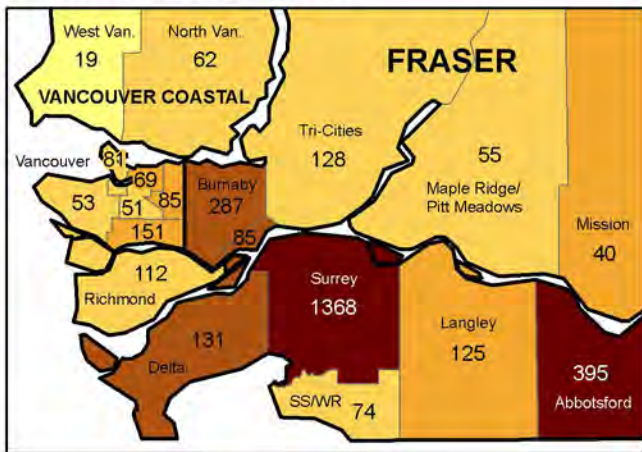

Notes: Cases are mapped by location of residence; cases with unknown residence and from out of province are not mapped.
