## Report Notes

- Outbreaks that are **bolded** are newly declared outbreaks during this reporting period.
- Data Source: As of April 2, 2022, data on Health Authority outbreaks are compiled from cumulative aggregate outbreak files provided by the Health Authorities to BCCDC. These files are current as of 10am every Wednesday.
- Case counts and deaths include PCR and Rapid Antigen Testing positive cases for outbreaks reported by Vancouver Coastal Health. Case counts and deaths include PCR and Rapid Antigen Testing positive cases, and suspect reinfections for outbreaks reported by Interior Health Authority. Case counts include PCR positive cases only for outbreaks not reported by Vancouver Coastal Health, Fraser Health and Interior Health Authority. Case counts and deaths include PCR and Rapid Antigen Testing positive cases, and suspect reinfections for outbreaks reported by Fraser Health Authority as of April 2, 2022. Cases with unknown role are included in the case count for staff/other.
- Residents of other Canadian provinces/territories are reported by their provinces/territories of residence.
- When health authority of residence is not available, cases are assigned to the health authority reporting the case.
- Data on outbreaks might be incomplete or vary from what is reported publicly due to differing data sources.
- Data may not be complete or accurate as data may be unavailable, not yet available in the public systems or updates are occurring over time.
- Inaccuracies may be noted when comparing between reports, and data should be interpreted with caution for those outbreaks that are still active.
- Providence Health Care is included within Vancouver Coastal Health data.
- Cases whereby preliminary case data is available but complete data is still forthcoming/ pending (whether the case is for a resident or staff member) are added to the Resident column and when complete information is available, moved to the staff column if it was a staff member.
- Due to the change in reporting source for outbreaks as of April 2, 2022, differences may be noted when comparing between historical files and current files. Information in the most recent file should be used.

## Report Definitions

### Health Authority (HA):

- Fraser Health Authority (FHA)
- Northern Health Authority (NHA)
- Island Health (VIHA)
- Interior Health Authority (IHA)
- Vancouver Coastal Health (VCH)
- Case definitions can be found at: [http://www.bccdc.ca/health-professionals/clinical-resources/case-definitions/covid-19-\(novel-coronavirus\)](http://www.bccdc.ca/health-professionals/clinical-resources/case-definitions/covid-19-(novel-coronavirus)).
- The outbreak definitions for these facilities is in this document: [http://www.bccdc.ca/Health-Info-Site/Documents/COVID19\\_LongTermCareAssistedLiving.pdf](http://www.bccdc.ca/Health-Info-Site/Documents/COVID19_LongTermCareAssistedLiving.pdf)
  - Outbreak definition: One or more clients and/or staff of a Long-Term Care facility/Senior's Assisted Living residence with a laboratory-confirmed COVID-19 diagnosis. The staff member(s) must have worked at the facility while symptomatic. In principle, an outbreak is considered over two full incubation periods after the last date of exposure, without any new cases. For COVID-19, two incubation periods equate to 28 days after the last date of exposure. The length of time to conclude an outbreak may be reduced or extended at the direction of the Medical Health Officer. Outbreaks in Senior's Independent Living residences are declared at the discretion of the Medical Health Officer of the regional health authority.
- Total cases = resident and patient cases + staff and other cases. Total deaths = resident and patient deaths + staff and other deaths.
- Community/ Facility Type:
  - Long Term Care (LTC)
  - Assisted Living (AL)
  - Independent Living (IL)

REMINDER: These data represent a snapshot in time. There will be minor differences noted when comparing this report to previous reports.

Active Outbreaks, Long Term Care
